

# The V-Class.

The VIP shuttle from Mercedes-Benz.

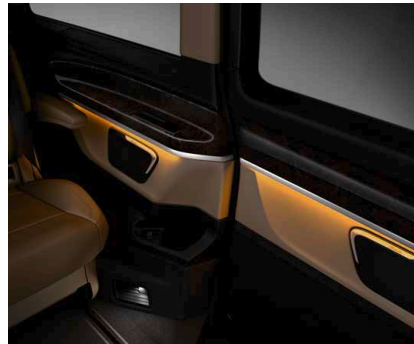

Mercedes-Benz  
The best or nothing.

# Lay on a stately welcome for your guests.

How about this for a prestigious appearance! The new V-Class is thoroughly impressive. A powerful front and unequalled lines give it striking looks. The elegant interior features select materials and first-class workmanship. And all in a language that is understood the world over: the exclusive design language of Mercedes-Benz.

### **A prestigious way to travel.**

Welcome aboard. The high-quality interior of the new V-Class adds another favourite place to your life. Four comfortable individual seats are fitted as standard in the rear. They provide supreme comfort and permit flexible use of the passenger compartment. The interior is especially high quality. The ambient lighting welcomes the driver and up to seven further passengers with a pleasant, indirect light and creates an agreeable atmosphere as soon as they get in – the ideal conditions for good talks on long journeys, whether an outing with the family or a trip with an international delegation.

### **Exemplary assistance and safety systems.**

One star on the radiator grille – and five for safety. The V-Class has been awarded from Euro NCAP. This is all thanks to the exemplary safety concept from Mercedes-Benz. To make sure that accidents don't even happen in the first place, the driver receives active support from intelligent technology which relieves the strain appreciably.

### **Intuitive multimedia concept.**

Being well networked these days is more important than ever. This also goes for the V-Class. As a highlight of the new telematics generation, the intelligent, optional COMAND Online system brings together all audio, telephone and navigation functions and has an Internet browser. The LINGUATRONIC voice-operated control system is also integrated.
